MINI ELECTRIC

MINI CHARGING PRODUCT GUIDE.
FINDING THE RIGHT CHARGING SOLUTION.

SIMPLY ELECTRIC: PLUG IN, CHARGE, DONE.

Whether smartphone, laptop or toothbrush - charging is part of our everyday life. And it's just as easy with your MINI: Cable, socket, done. How many kilometres do you drive every day? With a range of up to 234 km (WLTP), your all-electric MINI can cover everyday distances without stopping to charge. As soon as energy is needed, you can easily charge it overnight using the Standard Charging Cable (Mode 2) at a household outlet. Just like any other device.

HOME CHARGING

PUBLIC CHARGING
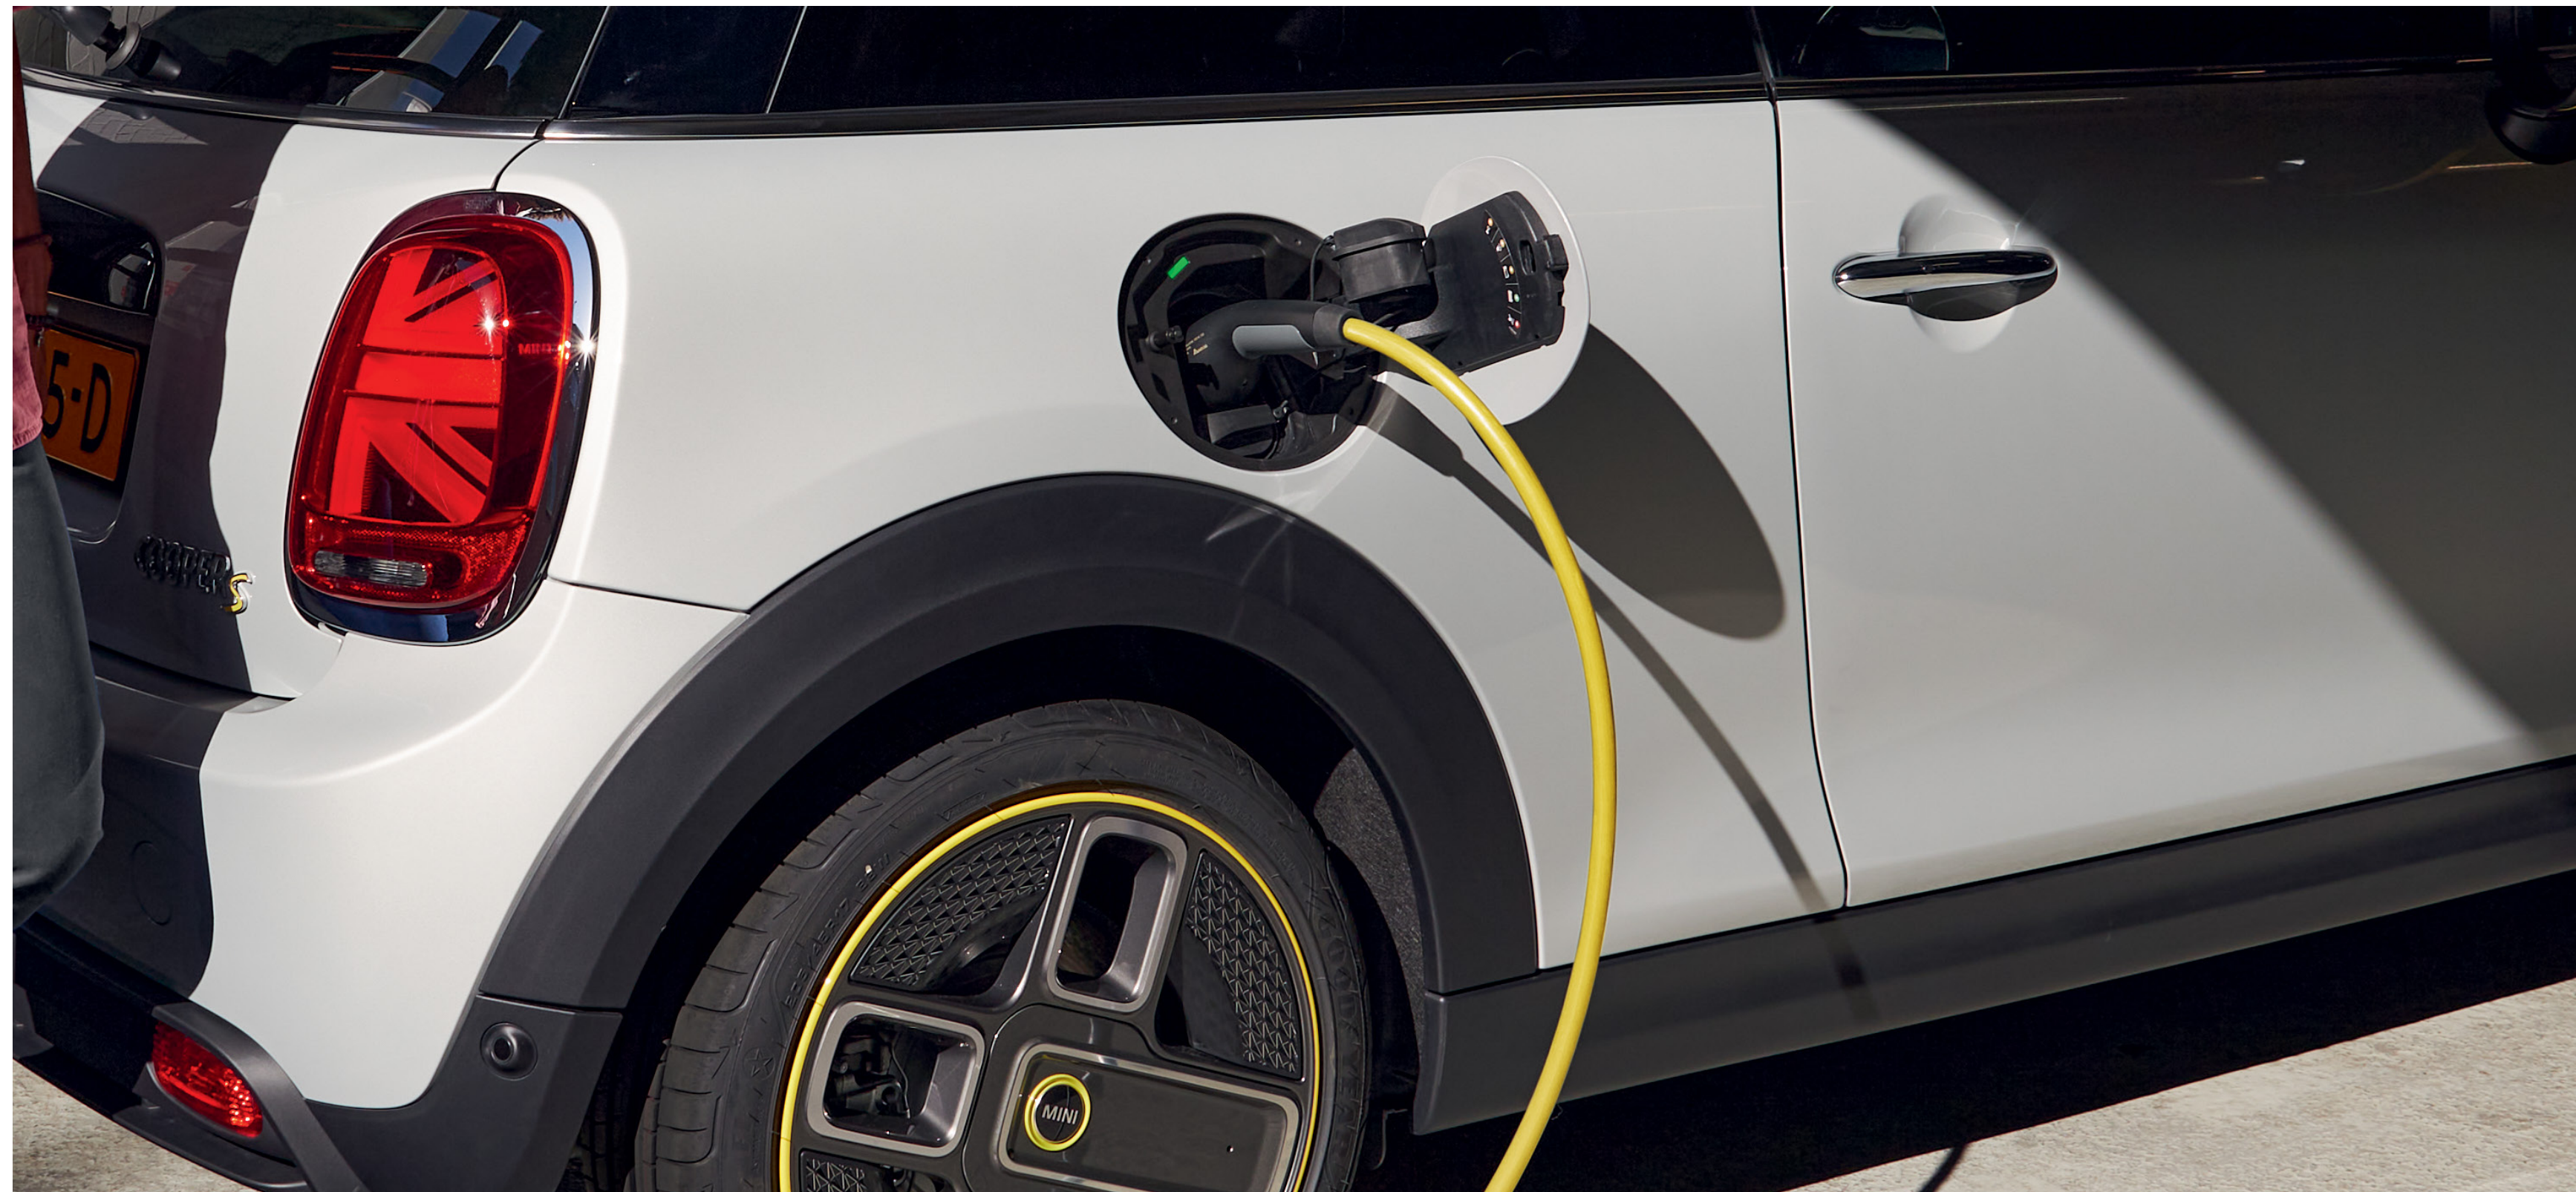

HOME CHARGING.

STANDARD CHARGING CABLE.

You don't actually need any complex installation or unit to charge at home. All you have to do is plug the Standard Charging Cable (Mode 2) into any conventional household 230-volt power socket a (3-Pin Wall Plug) - and relax.

Our surveys show us that the average commuter uses less than 20% of the MINI Electric battery per day.

Even if you use your normal domestic electric socket, this 20% is charged in approximately 3 hours. The Standard Charging Cable is, of course, included in your MINI Electric.

YOU CAN DO IT IN YOUR SLEEP.

Wake up, fully rested in the morning with to a "full tank" and start the day, full of energy. Just like a mobile phone, you can plug your all-electric MINI into your domestic household socket overnight and it will have recharged completely (approximately 15 hours).

MINI WALLBOX

The filling station at your home. With the permanently installed MINI Wallbox, you can charge your MINI quickly, reliably and conveniently with up to 11kW. In addition to its space-saving, compact dimensions in MINI design, the MINI Wallbox also offers convenient cable management. The status display also lets you see the current status of the MINI Wallbox at all times. Thanks to the integrated residual current detection, installation is also simple and cost-effective.

BENEFITS AT A GLANCE:

· Integrated Cable Management with inlet for the plug and cable holder enables convenient handling.
· Provides a Bluetooth Communications Interface.
· Robust and suitable for outdoor use (IP65).
· Reduced dimensions.
· Improved and easier installation.
· Cost optimised installation.
· LED bar at wallbox indicates charging status, operating mode and functional conditions.
